# Sydex

We are pleased to announce our current product offerings. We've released a major revision of our diskette utility; added new capabilities to our CP/M-to-DOS data transfer and emulation products; upgraded our diskette copier and "fax" programs, and updated other products. Our Concurrent Formatter has a few more "rave reviews" to its credit. We've also developed drivers for several not-quite-DOS machines. In the enclosed **Shareware Sampler**, you'll find a tempting array of shareware products that outperform their retail counterparts.

## VOLUME I - From CP/M and Almost-DOS to DOS

**22DISK**
Convert, format, and manipulate diskettes in over 150 CP/M 2.2 formats (300 in the registered version) to and from DOS files. ASCII diskette description file allows "roll your own" specifications for really hard-to-find systems. May require a 1.2M diskette drive. $25.00 single-user ($100 site/commercial) registration fee.

**22NICE**
This companion product to 22DISK emulates the CP/M 2.2 operating system and permits most CP/M programs to run under DOS. Once installed, the DOS-CP/M integration is seamless. Will make use of NEC V20 or V30 CPU chip if present. Emulates most terminals and provides a keyboard-remapping function to obtain the best operation using the PC's keyboard. Includes 22DISK. $40.00 single-user ($150 site/commercial) registration fee.

**RainDOS**
The flagship of our DOS compatibility series, just made for those DEC Rainbow MS-DOS diskettes. Use this driver to read your diskettes, transfer files, even format new diskettes for your Rainbow. $15.00 ($50 site/commercial) registration fee.

**EAGLE16**
Another driver in our DOS compatibility series, this product provides a solution to diskettes from this extinct-owner species. This driver lets you read and format Eagle 16 diskettes, and transfer files to your PC-compatible. $15.00 ($50 site/commercial) registration fee.

**HP150**
Need to have HP 150 files on a PC-compatible? The third product in our DOS compatibility series offers an alternative to the null modem method. $20.00 ($150 site/commercial) registration fee.

**CotDOS**
This fourth driver in our DOS compatibility series handles diskettes from the Sears/British Apricot--an attractive alternative to special cabling and communications for file transfer to your PC-compatible. $15.00 ($50 site/commercial) registration fee.

All products are compressed in "archive" form -- please consult the **READ.ME** file on each diskette for details. If you redistribute or share these products in "archive" form, please keep the names we've given them to avoid confusion.

*For United States or Canada, add $2.50 US for shipping.*

*For shipping outside the United States and Canada, add $5 US per product.*

## VOLUME II - Diskette Utilities for PC-Compatibles

**Con>Format**

A "pop-up" diskette formatter that allows you to format diskettes while doing more productive things.  Has received rave reviews from our users and some very nice words in the press (see June 1989 *PC Magazine*, page 48).  One of our all-time most popular programs.  Supports all current DOS formats.  $15.00 single-user ($50 site/commercial) registration fee.

**CopyQM**

A diskette duplicating machine--formats, copies and verifies all in one pass.  Up to four drives supported at once; features color icon-type interface, drive-status sensing (no keyboard entries).  Record/playback image files from hard disk, serialize copies, even copy non-DOS formats in "Blind Copy" mode.  All standard DOS formats supported. $15.00 single-user ($50 site/commercial) registration fee.

**FormatQM**

Mass diskette formatter in the same "no hands" tradition of CopyQM.  Formats *and verifies* faster than anything else around.  Supports all standard DOS formats, up to four drives at a time. $10.00 single-user ($50 site/commercial) registration fee.

**AnaDisk**

The compleat diskette utility.  Nothing like it anywhere else; scan, edit, repair and copy just about any kind of diskette.  Current release supports secondary diskette controllers, FAT editing, and sector dump to DOS file.  $25.00 single-user ($150 site/commercial) registration fee.

All products are compressed in "archive" form -- please consult the **READ.ME** file on each diskette for details. If you redistribute or share these products in "archive" form, please keep the names we've given them to avoid confusion.
